Light + Future
With all brands together

As the industry's leading flag for LED and lighting, GILE assembled many top brands in brand halls to demonstrate the most cutting-edge lighting technology, as well as to exhibit the application in "intelligent," "low carbon," and "health" areas.

Additionally, GILE will partner with well-known brands to offer participants a conference featuring the debut of exclusive lighting products.

What to expect at GILE 2024?

Exhibitors will showcase the latest trends in street lighting, including multi-functional lampposts, smart controls and central management systems, demonstrating how advanced technologies can be applied to lampposts.

Key highlights include:

- Reduced skyglow and light pollution
- Harmonised city lighting impressions
- Improving the quality of light
- Sustainability
